**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF OLIVE LACE BUG ON OLIVE TREES**

PERMIT NUMBER – PER81870

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 17 DECEMBER 2016 TO 31 JULY 2029

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LTD
Level 7, 141 Walker Street
NORTH SYDNEY NSW 2060

Persons who can use the product under this permit:

Persons generally

CONDITIONS OF USE

Products to be used:

PYGANIC ORGANIC INSECTICIDE (APVMA No. 59684)

PLUS OTHER REGISTERED PRODUCTS

Containing: 13 g/L PYRETHRINS as the only active constituent.

RESTRAINT:

Spray drift restraints:

Specific definitions for terms used in these conditions can be found at Apvma.gov.au/spraydrift

- DO NOT allow bystanders to come into contact with the spray cloud.
- DO NOT apply in a manner that may cause an unacceptable impact to native vegetation, agricultural crops, landscaped gardens and aquaculture production, or cause contamination of plant or livestock commodities, outside the application site from spray drift. Wherever possible, correctly use application equipment designed to reduce spray drift and apply when the wind direction is away from these sensitive areas.
- DO NOT apply unless the wind speed is between 3 and 20 kilometres per hour at the application site during the time of application.
- DO NOT apply if there are hazardous surface temperature inversion conditions present at the application site during the time of application. Surface temperature inversion conditions exist most evenings one to two hours before sunset and persist until one or two hours after sunrise.

Directions for Use:

Crop	Pest / Disease	Rate
OLIVES	Olive lace bug (<i>Froglattia olivinia</i>)	200 - 500mL/100L water

Critical Use Comments:

- Apply by calibrated airblast sprayer or similar equipment when damaging levels of pest occur.
- Apply sufficient water to provide adequate penetration and obtain thorough and uniform coverage of foliage. Avoid excessive run-off.
- Apply a maximum of six foliar applications per crop at a minimum 14-day re-treatment interval.
- Apply in accordance with the Resistance Management Strategy. To avoid the development of resistance, the product should be rotated with other approved insecticides from different chemical (MoA) groups.
- DO NOT apply more than two (2) consecutive sprays before changing to a different insecticide (MoA) group.

Withholding Period:

Harvest: Do not harvest for 1 DAY after application.

Jurisdiction:

All States and Territories.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.

Export of treated produce

Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human consumption. An TMRL has been established for PYRETHRINS in OLIVE OIL, CRUDE. MRLs can be found in the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Instrument 2023*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: Permit version 2 updated 31/07/2019. Extended duration to 31 October 2024.

15/07/2024 – Permit updated to include general spray drift restraints. Additional conditions updated to current standards. S161 statement added. Permit expiry extended to 31/07/2029. Permit issued as Version 3.
