Welcome

The Big Picture

01 Developed by Waterfind, this tool was designed to maximise efficiency in water use.

02 By taking the guess work out and eliminating the room for common errors and mistakes.

03 Receive real time insights from immediate input data for dynamic reporting and calculated planning.

Right Now

Operational & Reporting Functions

01

Meter Input & Logs

Direct input of meter readings allows for accurate and timely usage tracking.

02

Budget vs Actuals

Users can compare planned water budgets with actual usage in real time (monthly or accumulated).

03

Live Availability

Provides immediate visibility into how much water is accessible at any given moment.

04

Excess / Shortfall Alerts

Dynamically calculates whether usage is over or under budget, helping avoid penalties (current and end-of-year).

05

Site-Level Reporting

Enables granular or consolidated views of water use across different locations.

06

Business-Wide View

Offers flexible reporting for both enterprise-wide and site-specific management.

07

Task Delegation

Facilitates delegation and monitoring of water-related tasks across teams.

08

Event Notifications

Sends notifications to prevent oversight and ensure timely action.

For The Future

Strategic Planning & Risk Management

01

Long-Term Planning

Supports long-term water resource planning across multiple seasons or years.

02

Market Event Tracking

Integrates key market events that impact water availability and pricing.

03

Purchase Forecasting

Helps users forecast and schedule purchases to stay compliant with regulations.

04

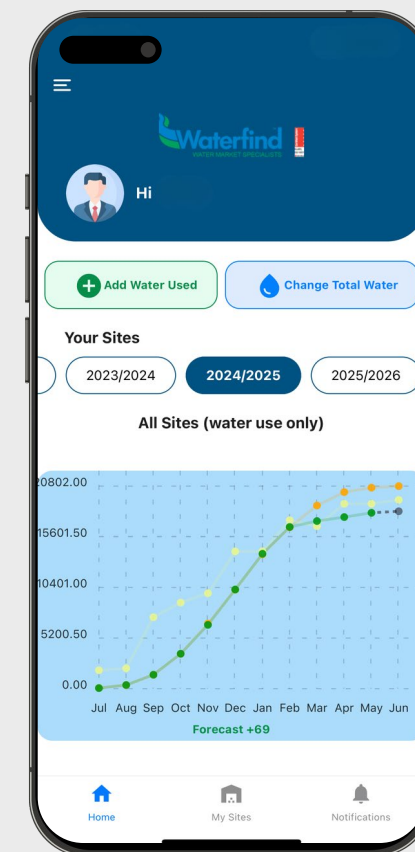

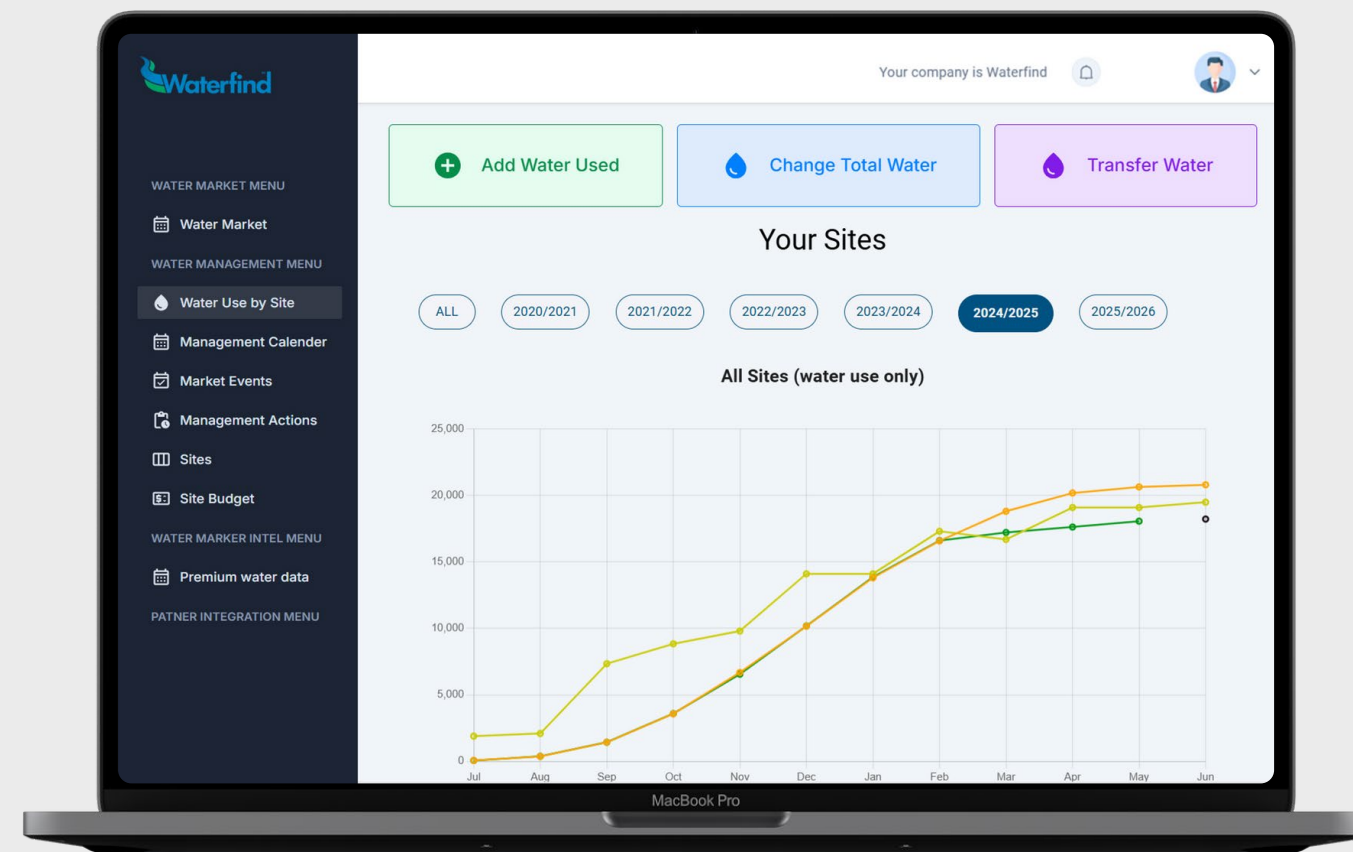

Remote Access

Allows users to manage water operations from anywhere, at any time.

Your Water Your Way

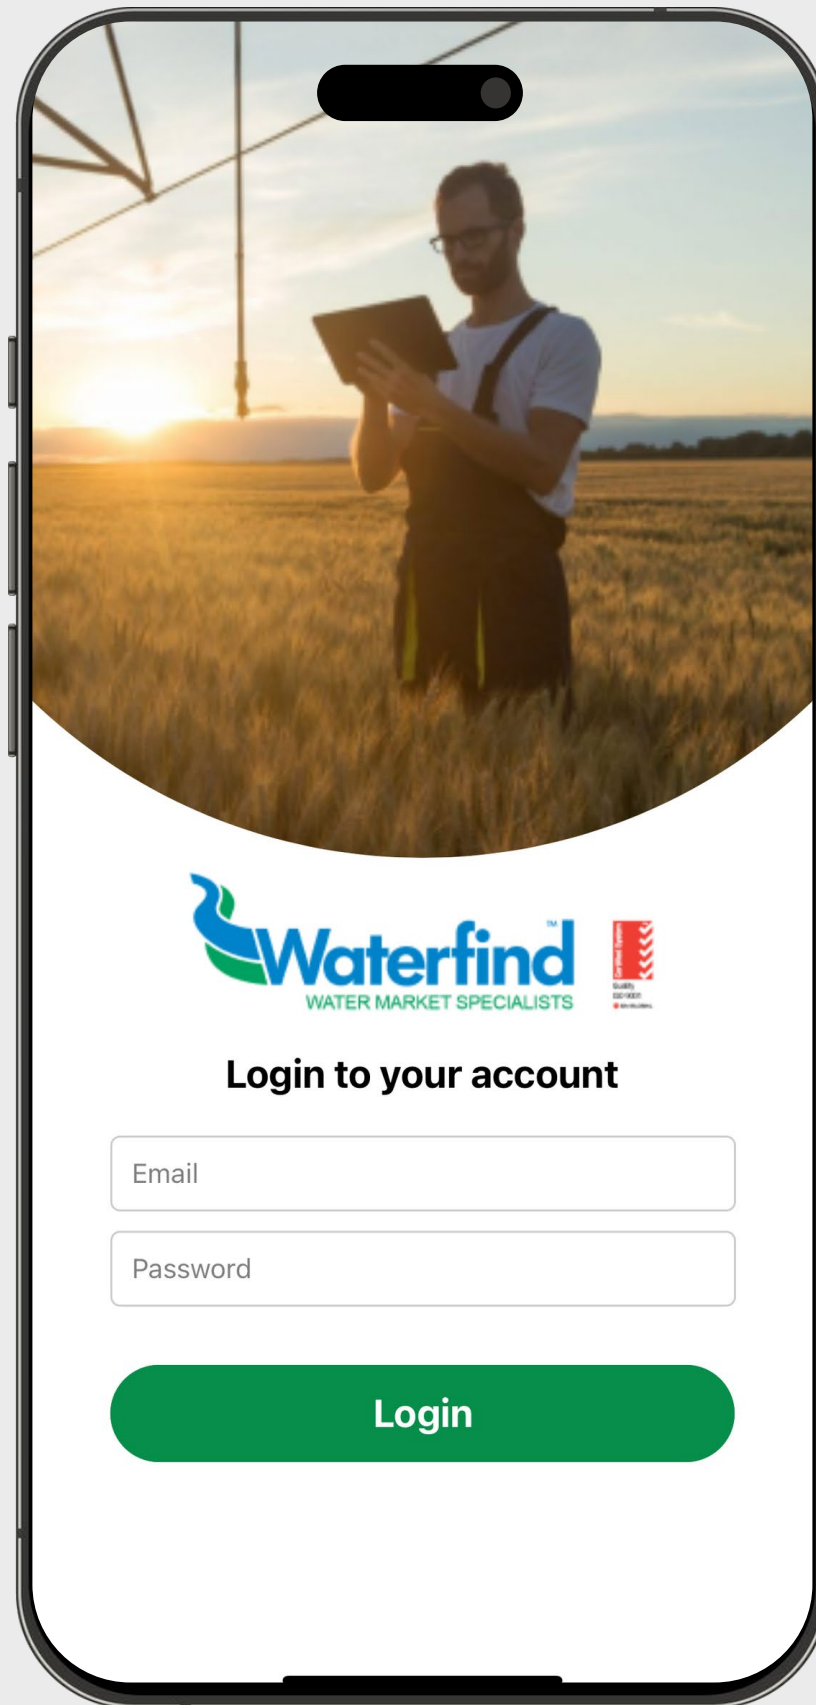

Manage your water, present and future, from anywhere

Phone Capabilities

From the farm directly to
the boardroom

01 Data Input

02 Track meter readings

03 Assign tasks

Do more for your property,
from your property

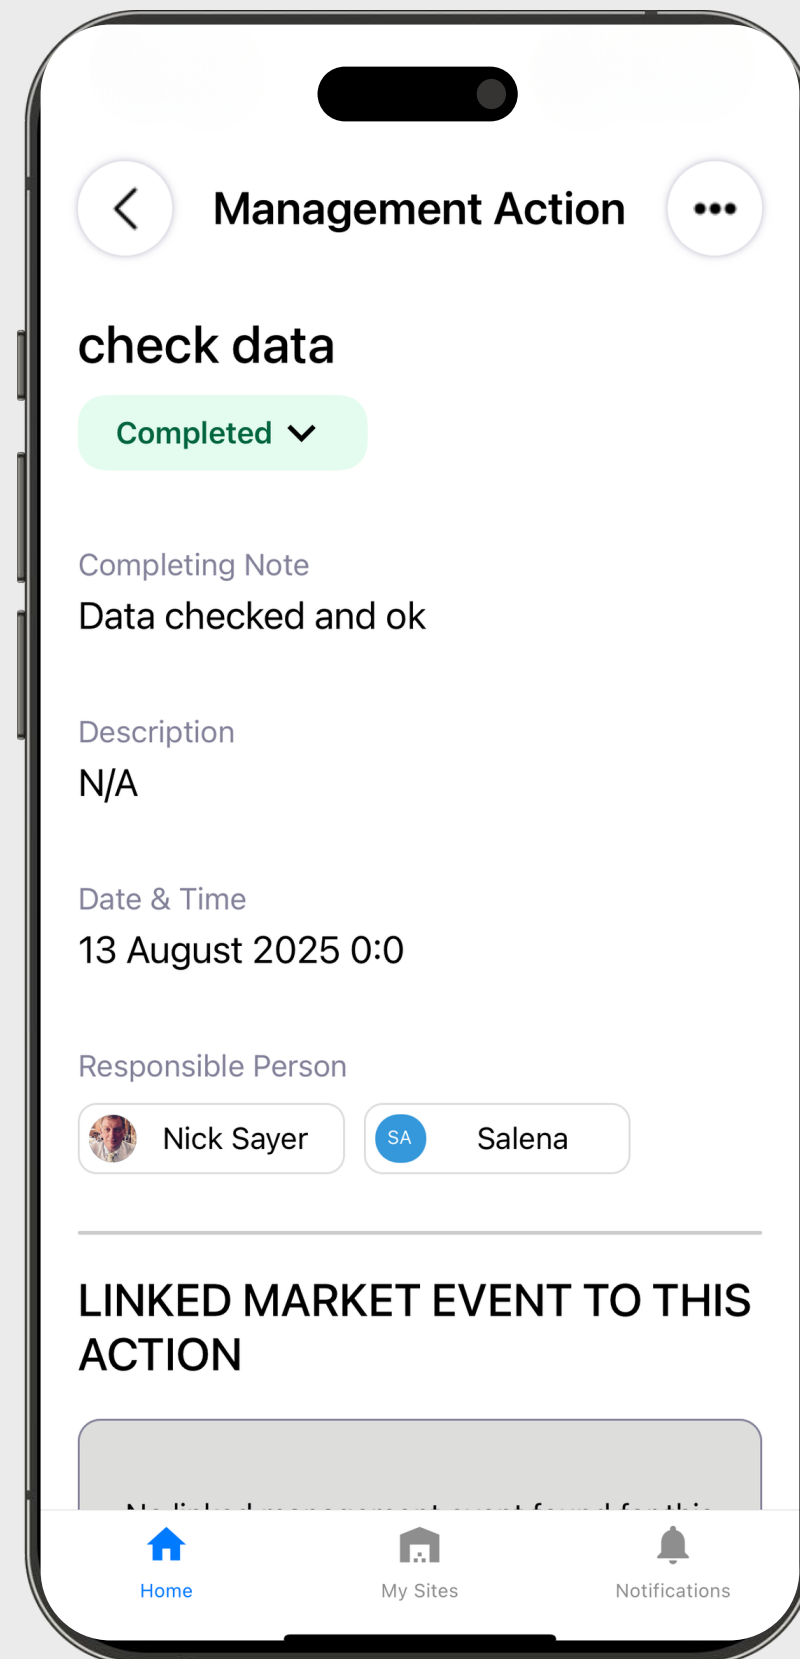

A mobile app interface for "Site Details". At the top, there's a navigation bar with a blue "Back" arrow, the title "Site Details", and a blue "Cancel" button. Below this is a tab bar with "CHART DETAILS" and "WATER USAGE", with "WATER USAGE" being the active tab. Under the "WATER USAGE" tab, there are three rounded buttons for the periods "2020/2021", "2021/2022", and "2022/2023". Below these is the label "Site 1". There are two view toggle buttons: "Meter View" (highlighted in green) and "Volume View" (greyed out). Below the toggles, it shows "Last meter reading date: Fri, Feb 28, 2025" and "Last water usage : 500 ML". The "Meter Reading (ML)" section features a numeric keypad with digits 0-9 and a decimal point. The digits entered are 0, 0, 0, 1, 2, 6, 0, 0, followed by a decimal point and two red-outlined boxes containing 0 and 0. Below this is the "Current Water Usage (ML)" section with a text input field containing "100". The "Select Start Date" section has a date picker showing "Fri Feb 28 2025" with a dropdown arrow. The "Select End Date" section has an empty date picker. At the bottom is a navigation bar with three icons: a house for "Home", a blue house with a plus sign for "My Sites", and a bell for "Notifications".

01 Input real time data from
multiple sites for everyone
in your business to view

02 Enter and track multiple site
meter readings in one spot

Do more for your property,
from your property

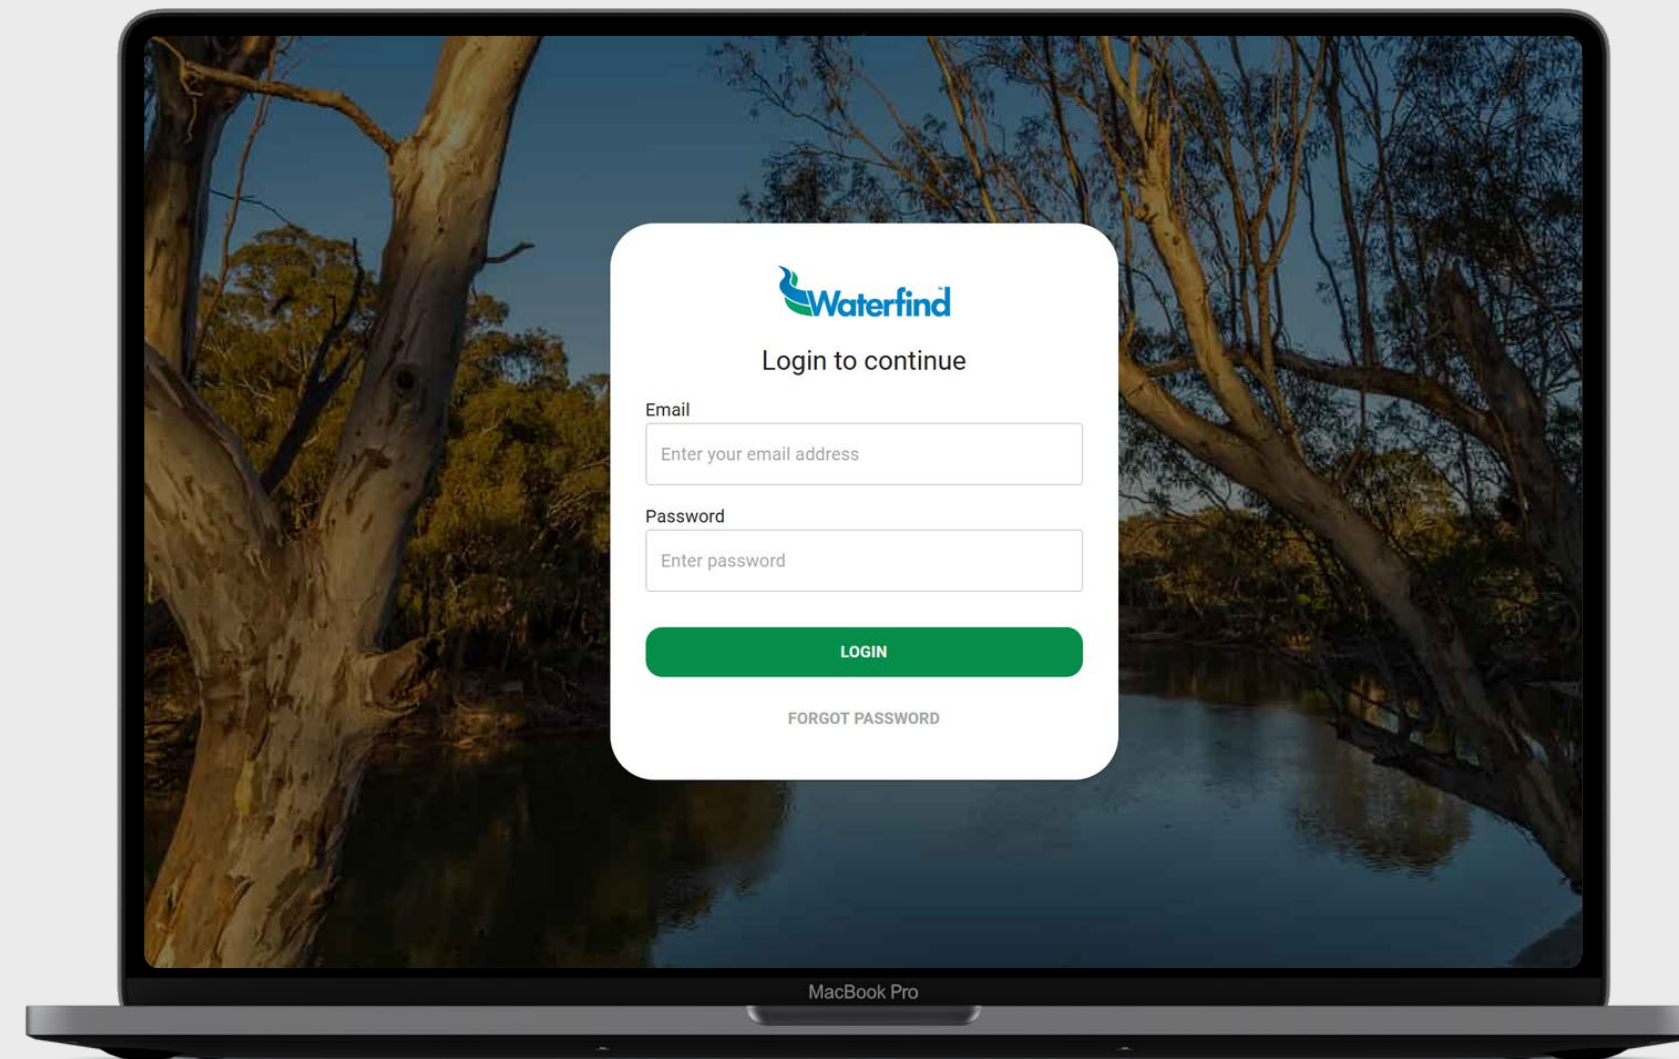

03 Assign tasks to individuals
or groups for specific sites
then have staff check them
off and add any notes for
ease of management

Desktop Experience

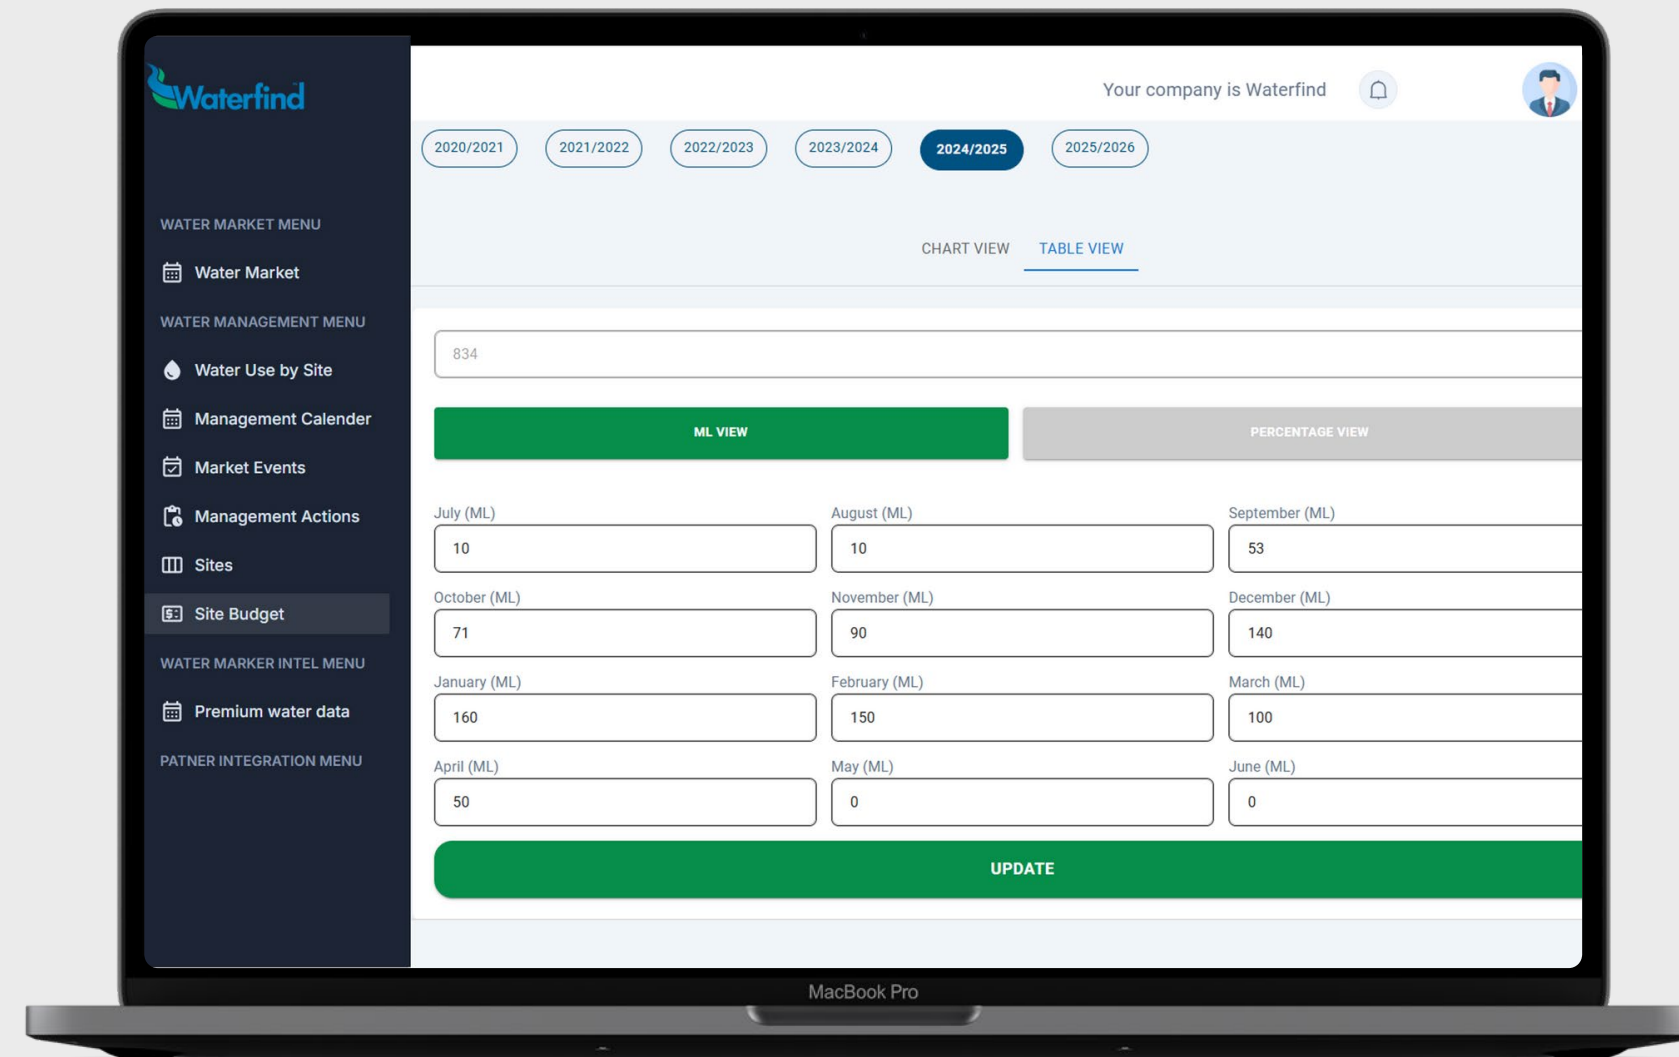

Log in and start today

The central data hub for all things water management and forecasting

Budgeting
